Do You Want to Name a New Rose?

Haven't you always wanted the pleasure and honor of naming a new Rose? Perhaps you have had a name in mind that you think would be particularly appropriate. Then here is your opportunity. One of my newest roses is unnamed! Will you name it for me? It is an exquisite, soft yellow Rose, born singly on long, strong stems. The petals curl back most attractively and the blossoms last long after being cut. You'll love it!

Every person ordering \$2.00 or more of Roses this Spring, has the privilege of submitting one name for this New Beautiful Yellow Rose.

The lucky person who suggests the winning name for this yellow beauty will not only have the honor of naming a New Rose, but in addition, will receive FREE a dozen of my finest Rose Bushes, plus a specimen plant of the newly named Rose. The winning name will be announced at the 1935 Cleveland Rose Show, held in June at the Garden Center of Cleveland.

Only one name allowed to a customer.

Write or print your name and address on the back of this sheet and submit your name suggestion here —

Melvin E. Wyant

Rose Specialist
MENTOR, OHIO

.....

A new everblooming climbing rose that is hardy and free flowering. It blooms from 3 to 5 times throughout the season and has strong pillar-like growth. The blossoms are of medium size, about 3 inches in diameter, very double, fragrant and in clusters. The color changes from a salmon pink in the bud to a flesh in the open blossom and in the hot summer, white. Only one to a customer and orders will be filled in the order in which they are received. \$1.50.

W. E. Chaplin

Dotty

Sunkist

Another new rose that is making many friends. The exquisitely formed buds of a good red rose. Here is a new one of a rich deep crimson that does not blue or burn. The high centered blooms are of perfect form and composed of large petals of heavy texture. A vigorous grower producing long strong stems. \$1.00

W. E. CHAPLIN

Space can always be found in the garden for a good red rose. Here is a new one of a rich deep crimson that does not blue or burn. The high centered blooms are of perfect form and composed of large petals of heavy texture. A vigorous grower producing long strong stems. \$1.00

SUNKIST

This newcomer has all the qualifications of a perfect rose. The unusual orange color, shading to salmon and with distinct veining is found in both bud and flower. It is a splendid grower and the blossoms last long as cut flowers. 85c.

DOTTY

Went's Exclusive Introduction. A very hardy rose of tall upright habit of growth that is ideal for the background of the Hybrid Tea bed or in the shrub border. The large ovoid buds of blood red unfold gracefully into splendid great big cupped blossoms 4 inches or more in diameter that are a rich velvety crimson. The blossoms are produced freely over the entire season and are born singly or in threes on long strong stems. \$1.50.

SENTINEL

Sentinel

Etoile de Holland—Magnificent vivid crimson flowers opening wide to display an attractive center. Free blooming even in hot weather. 75c.

Golden Dawn—Numerous small petals completely fill the centers. So husky it takes care of itself. 85c.

Briarcliff—A successor to Columbia having longer buds, more uniformly perfect flowers. 75c.

Mrs. G. A. Van Rossem—Large bushes producing abundant blooms of perfect form and color. An outstanding new Rose. 75c.

Mme. Butterfly—A dainty beauty that holds her own with the newcomers. Exquisite form, coloring and perfume. 75c.

Edel—No Rose collection is complete without this perfect white hybrid tea Rose. 75c.

Countess Vandal

Countess Vandal
Plant Patent No. 38

•
Melvin E. Wyant

Wilhelm Kordes

Chas. K. Douglas—Crimson scarlet color that does not fade. Strong plants with disease resistant foliage. A really good red Rose. 75c.

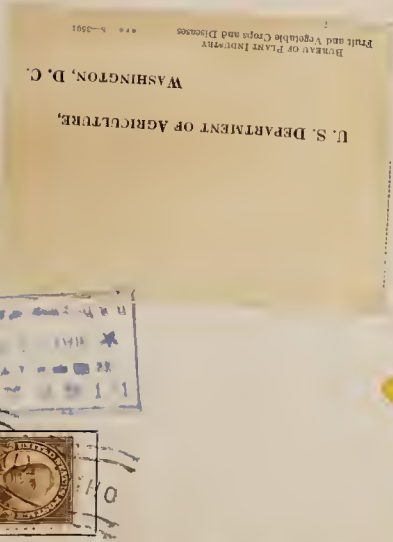

Joanna Hill—A soft yellow Rose that is always charming. Produces an abundance of beautifully formed blooms that last a long time after cutting. 75c.

Margaret McGredy—The large shapely brilliantly colored blossoms with the true tea perfume and the vigorous free flowering habit make this a universal favorite. 75c.

Wilhelm Kordes—Discriminating Rose lovers always include this variety in their plantings. Charming color, pungent perfume, low growing habits. 75c.

For Lasting Satisfaction Plant Wyant Roses

WE'VE BEEN TOO MODEST ABOUT OUR ROSES

We didn't expect to start a record breaking contest last year when we told you about Mr. and Mrs. J. R. Coleman of Cleveland who got an average of 36 blooms per bush the first year and 49 blooms the second, from their Wyant Roses.

But now there comes a letter from Mr. Jos. P. Swanson of Cleveland, announcing 807 blooms from 13 bushes, last summer, an average of 62 per plant! The plants had been set in the spring. Varieties that made an especially high score were E. P. Thom, Pres. Herbert Hoover, Rev. F. Page-Roberts, Talisman, Chas. F. Douglas, Mary Pickford, Roslyn and Wm. F. Dreer.

Which proves our contention that Wyant Roses are Better Roses.

DID BLAZE BLOOM FOR YOU?

If at the end of the 1935 growing season you find that the plant that I sold you in former years as a Blaze climber has never given bloom during the summer or fall, I will appreciate it if you will advise me. The producers of Blaze have agreed to replace such plants.

Please Read Before Ordering

SPECIAL DISCOUNTS ONLY ONE TO APPLY ON YOUR ORDER

Orders of 100 or more 75c roses in quantities of at least 5 of a kind—special price of \$45.00 per 100, F. O. B. Mentor.

On all orders of \$25.00 or more except collections—20% discount.

Any twelve 75c roses—\$7.50.

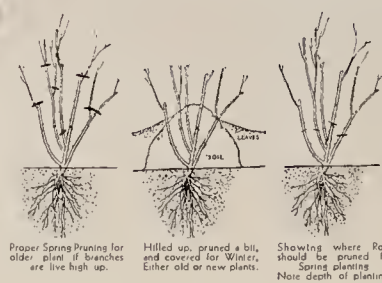

FREE—One 75c rose with each order of \$5.00 or more of roses other than those in special collection offers.

Only One Discount to Apply on Your Order

An equally good variety will be substituted if any of the kinds are sold out unless requested not to.

CULTURAL REMINDERS

Complete instructions for growing Roses are included with each shipment.

1. Begin right by buying Wyant Roses.
2. Plant as early as possible in the Spring.
3. When roses are received don't let them dry out.
4. Leave winter protection on a little longer than you think reason.
5. Remove winter protection a little at a time and then prune.
6. Fertilize each April and June if you want the best results.
7. Be systematic about controlling insects and diseases.
8. Disbud when side buds are very tiny if you want to produce specimen blooms.
9. Prune climbers only when they get too large for your bolls.
10. In pruning climbers remove the oldest canes after they bloom in June or July.

HYBRID TEA ROSES

This group includes the monthly blooming varieties together with the Pernetiana types that are in general similar in both habit and bloom.

These plants usually grow 1 1/2 to 3 feet high and are quite bushy. They should be planted from 12 to 15 inches apart in beds so that the surface of the soil between the plants can be kept loosened all Summer.

The Hybrid Teas are the most delicate of all the classes listed but because of their recurrent bloom they are by far the most popular and widely planted group. They are entirely hardy in this locality if given a slight protection of soil banked around the branches during the Winter.

Adele Cotton—A real new variety of a soft yellow color. The bushes are of moderate vigor. 85c.

Autumn—A most spectacular new Rose, having some of the same shades of color as in President Hoover but they are more intense and more of the scarlet is exposed. 75c. (Illustrated).

Betty Uncland—A free flowering, semi-double variety. The inside of the petals is a salmon pink, the outside is a glowing carmine with a copper sheen. 75c.

Biscuit—An improved Columbia with a clean, bright shade of rose pink. Sweetly scented and disease resistant. 75c. (Illustrated).

Chas. K. Douglas—A real good red Rose, loosely formed, fragrant flowers of a very striking crimson scarlet. 75c. (Illustrated).

Charles P. Kilham—The double large buds come out a blazing scarlet and open into bright orange pink. They make good cut flowers. 85c.

Chateau de Clos Vougeot—One of the darkest red Hybrid Tea Roses in existence. A moderate grower of spreading habit. 75c.

Countess Vanderbilt—Perfect, long-pointed buds of bronze, copper, salmon and gold open into very large, semi-double blossoms. \$1.00.

Dame Edith Helen—Very large, very double and of perfect form. Rose pink without shadings. Delightfully scented. 75c.

Director Rubio—Long cerise scarlet buds open into broad, semi-double blossoms of a solid deep pink. 75c.

Dotty—The deep orange coloring with cerise veining and markings is found in both the bud and open blossom which is of average size. 85c.

Duchess of Wellington—The suffusion of coppery yellow, blending to deep intense gold, makes superb buds for cutting. A vigorous grower. 75c.

Edel—An enormous, large, well-built flower. White with faint ivory shadings. 75c.

Edith Nellie Perkins—Handsome, long-pointed buds open into large, double, fragrant flowers. They are a salmon pink flushed orange. 85c.

E. G. Hill—Gorgeous, deep red buds open into immense, very double, rich blossoms that deepen in color with age. 75c.

Eldorado—Immense, very double golden yellow. Tall, vigorous growth, free flowering habit. 75c.

Elizabeth of York—Soft, cerise-pink, yellowing at the base of the petals. Semi-double, free blooming. 75c.

Etoile de Hollande—One of the best among red Roses. A splendid grower, a reliable bloomer with rich beautiful flowers. 75c.

Frau E. Weisbach—A large, high centered, globular, soft yellow. Vigorous grower and free bloomer. \$1.00.

Golden Dawn—Almost foolproof variety. Large, double blossoms are light yellow. The plant is low growing and bushy. 85c.

Guss on Tepitz—It is the most hardy, the most vigorous and the most free blooming of all red Roses. A tall grower. 75c.

Henrich Garden—One of the most beautiful new Roses. Both shape and color superb. Deep gold with heavy apricot shadings. High centered and double. \$1.50.

Independence Day—A very prolific bloomer. Beautiful and distinct blossoms of copper and apricot are semi-double. 75c.

Innocence—One of the single Roses. The large, broad, pure white flowers are freely produced. 85c.

Lish Hope—A deep red Rose, broad petaled buds opening to moderately full, fragrant flowers. Not a tall grower but has good habit. 75c.

J. C. Thornton—Long pointed buds that are good for cutting. Bright, glowing, scarlet crimson blossoms, well shaped and lasting. 75c.

Joanna Hill—Soft attractive yellow flowers are of exquisite form and are borne singly on very long, strong stems. 75c.

Jonkhee J. L. Mock—Very double, large, high-centered blossoms of a silvery pink, reverse carmine pink. 75c.

Jonkhee Cavalier—A free flowering scarlet crimson rose with reddish foliage. 75c.

Jules Gaujaud—Distinct and beautiful, large, orange Rose. Blossoms have a sparkling appearance different from other Roses. 75c.

Julien Potin—The color is a charming shade of deep yellow. The buds are long pointed. 75c.

Kaiserin A. Viktoria—The perfect form of the medium sized blossoms keeps this rose popular. Snow white with a touch of lemon. 75c.

Lady Alice Stanley—One of the finest garden Roses. Large blossoms with broad petals of deep rose, the inside pale flesh. Intensely fragrant. 75c.

Lady Ashtown—The long pointed buds open into large, fragrant, high centered blossoms with deep pink, relieved petals. 75c.

Lady Fortviot—The semi-double blossoms are borne in profusion and make a great showing. Bright yellow color, flushed with cardinal red, giving a deep apricot appearance. 85c.

Lady Margaret Stewart—The color is a wonderful burnt orange, splashed with orange scarlet. Not a very strong grower. 75c.

Lady Ursula—This very free bloomer is a delicate flesh pink color. The bush is of unusually vigorous, upright habit. 75c.

Laurent Carle—Produces large, intensely fragrant flowers with large buds opening into brilliant velvety carmine blossoms. 75c.

Los Angeles—One of the most beautiful Roses grown. Flame pink with gold at the base of the petals. Protected from black spot. 75c.

Lucie Marie—A large grower freely producing cupped salmon blossoms. 75c.

Luxembourg—A new Rose of excellent color and form, deep orange, changing to old gold. 75c.

McGedy's Scarlet—A light scarlet in the Summer but in the fall deep scarlet with gold at the base of the petals. Flowers perfectly shaped. 85c.

Magaret McGedy—Attractive, unique coloring of orange-vermillion in a globular Rose of large size. 75c.

Wyant Roses are all two-year field grown budded bushes of the highest quality. Having been raised in the severe climate of Northern Ohio by a Rose Specialist, they will produce satisfaction in your garden.

GUIDE TO GROWING BETTER ROSES

WYANT'S MASSEY DUST

For the Control of All Rose Diseases and Chewing Insects

This dust is composed mostly of sulphur, but it is many times more effective than powdered sulphur. It is fine enough to stick to dry Rose foliage and is soluble so that it will stick during rains. Wyant's Massey Dust is sulphur colored, but it does not need to be applied heavy enough to badly discolor the foliage and should be applied

with a good dust gun so as to get it on the undersides of the leaves as well as the top surfaces. This dust is also often used to kill the worms on vegetables and perennials and to prevent the diseases on many other garden flowers. It is the same dust we use in the fields to dust our Rose bushes. 5 lb. carton, \$1.00.

Pomo-Green

WITH NICOTINE

Leaf-green, all-in-one material to use as either a dust or spray for Blackspot, Mildew, Rusts, Blight, Leaf-eating Insects and Sucking Insects.

sects (Aphids) on Roses, and also on annuals, perennials and shrubs. Highest endorsement by American Rose Society. 5 lb. can, \$3.00.

Pomo-Green

WITHOUT NICOTINE

Same as above, except that it contains no nicotine for controlling Aphids. Used as dust only; will stick to dry foliage. 5 lb. carton, \$1.75.

DUST GUN

An efficient, economical dust gun is one of the essential tools for Rose growing. The one pictured above, which we highly recommend, holds about one quart of dust, has a 24-inch extension with a curved nozzle and is so well constructed that it should last you as long as you use Roses. It shoots the dust in a cloud so that it spreads evenly and economically on all leaf surfaces and is so easy to operate that children love to work them. Any of our dusts may be left in the gun from one time to another without harm. \$1.25 each.

PRUNING SHEARS

It is a pleasure to work with good tools. The shears pictured at right are light, durable and well made. We use these shears in all of our own work and find them so much superior to most shears that we are offering them to our customers. \$2.50 each.

Hybrid Perpetual Roses

Hybrid Perpetuals are an older class of Roses which our parents used to enjoy so much. The bushes burst forth in a marvelous display of blooms in June, and if given good care will again bloom in the fall. Their flowers are of very large size and are more richly fragrant than any other class. The bushes are strong, upright, and more hardy than the Hybrid Teas. For a mass of bloom do not prune hard.

Druschki Ruba—Similar to Frau Karl Druschki in form but a light red color. 75c.

Frau Karl Druschki—The loveliest of all Hybrid Perpetuals. A snow-white of absolute purity; the large buds of unexcelled form. 50c.

General Jacquemont—The old favorite "Jack" Rose. The deep rich crimson color of the fragrant double blossoms is long remembered. 50c.

George Arends—A large delicate pink, in its most exquisite shade. Deliciously fragrant. 50c.

J. B. Clark—Very large full blossoms of an intense deep scarlet are borne several together on long, strong stems. Prune severely. 50c.

Mme. Albert Barbier—The full cupped, soft yellow flowers are produced at intervals throughout the whole season. More like a Hybrid Tea than a Hybrid Perpetual requiring winter protection. 75c.

Mrs. John Leing—In the soft pink Hybrid Perpetuals, this variety persists among the superior Roses. One of the most constant bloomers of this class. 50c.

Mrs. R. G. Shallen-Gawford—Imbricated deep rosy pink blossoms are large, full and cupped. Vigorous growers and abundant bloomers. 50c.

Paul Neyron—Attains enormous proportions in spite of lack of painstaking care, responding with long, almost thornless stems and deep rose-colored blossoms similar to American Beauty. 50c.

S. M. Gustave V.—One of the continuous blooming Hybrid Perpetuals. Cherry red color, medium sized, well shaped buds. 75c.

Ulich Brunner—A cherry-red; its petals are of great substance and the blooms are lasting. Very fragrant. 50c.

Polyantha Roses

These are the Baby Rambles or true ever-blooming Roses. They have clusters of flowers like the climbing rambles, but are low growing, seldom exceeding 18 inches in height, and they are continually in bloom. The Polyanthas require little or no Winter protection and only pruning enough to keep them shapely or to remove dead twigs.

Cecil Brunner (Sweetheart)—The charming little buds of sea-shell pink are perfect for bouquets. 75c.

Eblouissant—A very dazzling velvety dark red variety that does not "blue" with age. 50c.

George Elger—Pointed yellow Hybrid Tea shaped buds of large size for a Polyantha. 75c.

Gloria Mundi—Flowers of orange-scarlet; the most spectacular of the Polyanthas. 50c.

Greta Kluis—The blooms resemble apple blossoms with delicate shell-pink color and crimson markings. 50c.

Guss on Aachen—Flowers the size of the Hybrid Tea which is a tint of apricot or rose in the center petals. 50c.

Ideal—Small, rich garnet-red flowers are borne continuously in large clusters. 50c.

Lafayette—Large flowers of striking light crimson produced in great freedom. 50c.

Magnifique—A strong grower bearing large trusses of small pink blossoms. 50c.

Princess Juliana—Small blossoms in large clusters. The colors vary from salmon pink through flesh to white. Strong upright growth. 50c.

Tip-top—Also called Baby-Doll. Small perfectly formed buds open into striking full miniature flowers. Trian rose passing to white and pale yellow. 75c.

Verdun—Quite large, deep carmine-red flowers. Very vigorous. 50c.

Climbing Roses

The Climbing Roses offered here are the best of their class. Like other styles, the styles in climbers are changing. Very few of the old rambles are planted; the demand is almost entirely for the newer climbers which have other qualifications to commend them besides their climbing habit and abundant bloom, such as long stems which are suitable for cutting, disease-resistant foliage and large blossoms.

If plants become too large, remove oldest branches immediately after they are through flowering in June.

Allen's Fragrant Pillar—Large full fragrant satiny pink blossoms. Recurrent blooms. \$1.25.

American Pillar—Vigorous climber with great clusters of single, clear, rosy pink flowers, with white centers and tints of golden yellow stamens. 75c.

Apoles Mestres—A wonderful new Rose. Has large deep Claudius Pernet yellow blossoms that last an unusually long time. \$1.00.

Birdie Blye—Grows to only about 5 to 6 feet. Blossoms almost continuously and bears medium sized rose-pink flowers. Also used as an everblooming shrub. \$1.00.

Black Boy—The blossoms are a deep velvety red. Recurrent blooms. \$1.25.

Blaze—An everblooming—Pauls Scarlet Climber. It is very hardy and established plants are quite continuously in bloom. \$1.50.

Chaplin's Pink Climber—Large trusses of pure pink flowers are borne in great abundance on strong growing plants. 75c.

Climbing American Beauty—A large flowered carmine Rose, the size and color very closely resemble the Hybrid Tea Rose, Red Radiance. Very fragrant. 75c.

Comet—See illustration and description on reverse side. \$1.50.

Countess of Stradbrook—Good double deep red blossoms that resemble those of Hybrid Teas. Recurrent blooms. \$1.50.

D. W. Van Fleet—The most popular climbing Rose. Large, soft pink flowers on long stems, waxy foliage and vigorous growth. 75c.

Climbing Roses—Continued

Dr. Huey—The darkest of all hardy climbers. The broad semi-double blossoms are a deep mauve that they color. 75c.

Dubouss—One of the new Harvath Hybrids, extremely hardy. A large vigorous grower with big double bronze yellow blossoms. \$2.00.

Golden Climber—One of the most beautiful of all climbers. The large golden yellow blossoms maintain their color until they fall and are of beautiful form. \$2.00.

Inermis—It is the earliest climber to come into bloom; it is the most hardy of all my climbers; it is absolutely thornless; it has a delicious rose pink blossom and is a rank grower. 75c.

Jacotte—Not always hardy. The large moderately fragrant flowers coppery yellow, tinted coppery red. Makes a spectacular display in midseason. 75c.

Kitty Kininmonth—One of the delightful Australian varieties that blooms over a long period. The broad, bright pink blossoms with golden stamens are supremely lovely. \$1.25.

Le Reve—A delightful yellow variety that serves well as either a pillar or a climber. Very large blossoms. 75c.

Mary Wallace—Large semi-double flowers of a bright rose-pink on long stems. 75c.

Max Graf—The perfect Rose for trailing purposes. Broad, shining pink single blossoms are produced abundantly in June. Heavy deep green foliage that is very persistent. 75c.

Mermid—A delightful large single yellow that blooms quite continuously. Likes to trail, needs some winter protection. \$1.50.

Miss Marion Manifold—Large globular flowers of a velvety scarlet are borne several together on medium length stems. Recurrent blooms. \$1.00.

Mme. Gregoire Stacelin (Spanish Beauty)—The cupped blossoms are a flesh pink flushed with crimson and the petals are attractively curved. 75c.

New Dawn—New everblooming D. Van Fleet climber. The large, soft pink flowers appear intermittently during the Summer and Fall. \$1.25.

Paul's Scarlet Climber—All who see its name, well-formed glistening scarlet flowers are immediately thrilled by it. 75c.

Scorcher—The stunning fragrant flowers of gorgeous scarlet are semi-double and open to about four inches. Blooms over a long period. \$1.00.

Silver Moon—Pure white, semi-double flowers, about four inches across, with golden yellow stamens. One of the most vigorous of all climbers. 75c.

Star of Persia—A really hardy yellow climber which stays golden yellow until the blossoms fall. Single flowers are about three inches across. 75c.

Velchenblau—The blue flowers appear in large clusters on long stems are semi-double, fairly lasting and intensely fragrant. \$1.00.

Zephyrine Drouhin—The long-pointed, rose-pink blossoms are semi-double and moderately fragrant. Thornless stems, recurrent blooms. \$1.00.

Miscellaneous Roses

These Roses do not come in any of the classes before listed and in planting should not be set in beds with the Hybrid Teas. The following varieties are particularly valuable in masses, hedges, in shrub borders, or as specimen shrubs on account of their hardiness, healthiness, and their ability to thrive even under adverse conditions.

Agnas—A yellow Rugosa Hybrid fragrant and double. A vigorous upright grower. 50c.

Austrian Copper—A very hardy climber with the reverse of the petals a golden yellow. Mature plants 5 to 6 ft. high. 50c.

Austrian Yellow—Similar to its sister, Austrian Copper, but with its numerous 5-petaled flowers a bright yellow. 50c.

Conrad F. Meyer—Light pink, very fragrant, large, full double blossoms. Recurrent blooms. Tall grower like a pillar Rose. 50c.

D. Eckner—New, thornless remontant bloomer. Has attractive lawn colored blossoms. A large thorny grower. 50c.

F. J. Grootendout—Is in bloom from early Summer until late Fall, with large trusses of fringed carnation-like red flowers. 3 to 4 ft. grower. 50c.

The Green Rose (Rose semperflorans viridiflora)—The really green blossoms are produced abundantly and almost continuously from early Spring until freezing. Bush about two feet high. \$1.00.

Harrison's Yellow—The old fashioned yellow shrub Rose. A large easy grower and early bloomer. 50c.

Hermosa—The old fashioned everblooming pink Rose. The bush is a low compact grower. 50c.

Hugonis—Bright yellow flowers, which come out the earliest of any Rose in the Springs. It grows about six feet high. 50c.

Lord Penzance—One of those fragrant Sweetbriars. Has attractive lawn colored blossoms. A large thorny grower. 50c.

Moss Rose—These old favorites are noted for their delightful fragrance as well as for the attractive moss clothing of the bud. Red, pink and white, state your choice. 50c. Yellow \$1.00.

Pink Grootendout—Julius F. J. Grootendout except that it bears pretty light pink blossoms. 50c.

Rubifolia—An attractive rose all year. Purple stems, purple foliage, pink blossoms in a mass and orange red berries. 50c.

York and Lancaster—The famous old variegated Rose. Red and white striped petals. Medium sized bush. 50c.

STANDARD OR TREE ROSES

Are available in many varieties and colors, and can be had in some varieties which will give almost continuous bloom throughout the Summer. They are especially valuable as accent points in Rose gardens. Order by color. It is best to plant these in the Spring. \$2.50 each.

THE CHRISTMAS ROSE

Startling	Charming	Beautiful
Produces white, waxy blossoms profusely outdoors from Thanksgiving until Christmas and then off and on all Winter. The Christmas Rose (Helleborus niger) is a low compact grower, about 6 inches high and really belongs to the rock garden or among the perennials.		

Order early while the supply lasts
75c each, 6 for \$4.00
